Backgrounder

The Story: A product of the personal struggles of co-founders John DeHart and Ken Sim, Nurse Next Door was established in September of 2001. John was trying to find a caregiver for his grandmother suffering from Alzheimer's while Ken was looking for a caregiver when his wife was confined to bed rest during pregnancy. The two were surprised to see that the majority of those offering services were not certified, insured or thoroughly screened. They knew they could do better.

Services: At Nurse Next Door, we offer a full spectrum of home healthcare services ranging from companionship to complex medical care right at our clients' homes. We employ the best certified caregivers around to provide superior service and are dedicated to delivering responsive, caring and high quality homecare services. With our services, we allow daughters to remain daughters, sons to remain sons, and families to remain families, while we take care of the caregiving.

Lives Helped: Since 2001, Nurse Next Door has serviced thousands of clients and has made the lives of their families much easier. Every year we prepare over 20,000 meals, help clients get into and out of bed more than 10,000 times, and allow over 100 clients to enjoy their last moments of life peacefully.

Vision: Currently expanding across Canada, Nurse Next Door's long term goal is to have 500 franchise partners world-wide, servicing 50,000 clients every year.
